Subject: ACP water impact .

As a landowner affected by the proposed pipeline, I am very concerned about short range and long range implications for my wetlands in Johnston County. It appears to me that DEQ is prepared to give blanket approval to crossing 1000's of streams and not looking on an individual basis. I encourage you to postpone any approvals

For the pipeline until proof of need is unequivocally established and until safety of streams and wetlands are reviewed on an individual basis

With assurances to the safety of

Habitats and water supplies.

The few should not mandate

The lets get rich scheme of the next 15 years until our entire country gets motivated to hang their hat on renewable energies at which time our tears will be too late to save our lands and streams. Vote No
